OilClean™ Bioremediation Agent Receives EPA Designation

Provides Advanced, Monitored Oil Bioremediation for Contaminated Water and Soils

WARREN, RI. —The Environmental Protection Agency (EPA) has listed Pro-Act Biotech's [OilClean™](#) bioremediation agent for oil-contaminated environments on the EPA National Contingency Plan Product Schedule. The non-invasive, innovative, and self-powered OilClean system automatically distributes oil-eating microbes, nutrients, and oxygen and features onsite and remote system management capabilities. It is one of only 20 oil bioremediation systems listed on the EPA National Contingency Plan Product Schedule.

OilClean combines biological and patented technologies to naturally degrade oil and restore oil-polluted ecosystems. A joint venture between [Pro-Act Biotech®](#) and [EcoSolutions LLC](#), it is the only system available that optimizes treatment by monitoring water quality in the treatment zone to balance nutrients and dissolved oxygen to achieve efficient and reliable results. The advanced OilClean system automatically regulates the flow of additives via the Control Panel to maximize the remediation and restoration process. OilClean microbes continue to multiply until the oil is gone and unlike dispersants will not harm the environment.

Effective for pre-treatment of oil polluted waste such booms, rags, and plastics prior to landfill transfer, OilClean is also ideal for treatment in sensitive marsh and wetland environments and for ground water and soil remediation challenges.

For more information visit www.oil-clean.net or call 1-800-772-3775.

About Pro-Act Biotech, Inc.

Pro-Act Biotech, Inc., is the leading supplier of biological waste treatment systems for the agriculture, food, aquaculture, and oil and gas industries. The company's waste treatment and waste-to-energy solutions reduce TSS, BOD, viscosity and odor stabilizing natural and man-made environments. The environmental treatment systems of PRO-ACT Biotech® are protected by U.S. Patent No. 7,267,766. Other U.S. and foreign patents pending. For info contact www.proactbiotech.com or call 800-772-3775.

About EcoSolutions LLC

[EcoSolutions LLC](http://www.ecosoldesigns.com) is an engineering consulting and design firm that specializes in the practical application of ecological design principles for innovative wastewater, stormwater and site planning projects. EcoSolutions offers design/build services, as well as operation and maintenance services for each of their innovative designs. For info visit www.ecosoldesigns.com or call 802-878-7464.

EPA Disclaimer

The NCP listing does not mean the EPA approves, recommends, licenses, certifies, or authorizes the use of PRO-ACT on an oil discharge. This listing means only that the data have been submitted to EPA as required by subpart J of the National Contingency Plan, 40 CFR Section 300.915.
